DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group III, Species A in the reply filed on 4/17/09 is acknowledged.

2. Claim 33 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/17/09.

Claim Objections

3. Claims 32, 47, and 48 are objected to because of the following informalities: With regard to claim 32, it appears that the phrase "configured for" should be inserted before "directly" (line 6) to more accurately reciting the claim limitation. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 32, 47, and 48 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has amended claim 32 to recite "an open window". However, there is no indication from the original specification

Application/Control Number: 10/786,623 Page 3

Art Unit: 3768

of a teaching of such a structure. It is noted that the specification refers in the paragraph beginning on page 160, line 4 to a "window 502" that is a physical object without any opening. Further, the paragraph most relevant to the elected invention starting on page 197, line 6, also mentions a window, but provides no evidence that a different meaning was meant for this term than that applied in the paragraph of page 160. It is noted that Applicant has not described an open window or an aperture element anywhere in the 239 pages of the specification. In addition, the recitation regarding the "field of view of said open ended window" of the final two lines of the claim is not adequately disclosed in the specification. Applicant has neither described a manner in which an open ended window can be so limited (it would appear that an open ended window would be considered to have a field of view of 180 degrees, not less than or equal to five degrees, as set forth in the claim) nor is there even a discussion of a field of view of a window in the specification. The only discussion of a field of view is in the paragraph starting on page 195, line 13, which is associating these parameters with a lens (which is an element of a non-elected embodiment). There is no explanation of how to implement this limited field of view in an open window arrangement. As such, the claims contain subject matter that the specification does not describe or show possession of at the time of filing.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Everest, Cheslock et al., and Egawa teach detector

arrangements including sensors at the ends of columns that restrict the field of view of

the sensor.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Eric F. Winakur whose telephone number is 571/272-

4736. The examiner can normally be reached on M-Th, 7:30-5; alternate Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Long Le can be reached on 571/272-0823. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
